Table of contents

1 INTRODUCTION

2 TALENT PROFILE

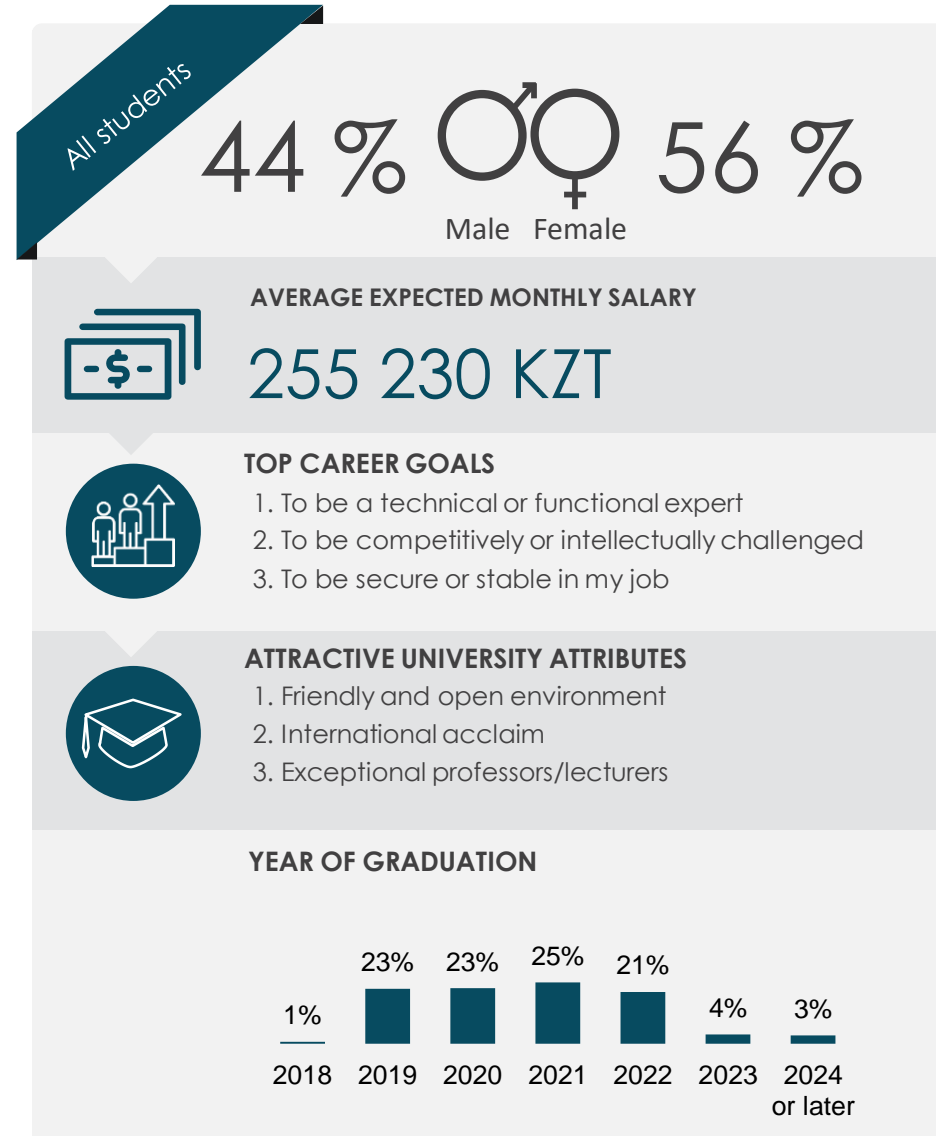

This chapter focuses on the **competences** of your talent and how they **compare** to the comparison group.

These insights will help you **improve** the employability of your talent by being able to communicate their **unique value** to employers.

The Universum Career Profiles

The students' profiles

Skills Self Assessment

Without proof of performance, employers cannot be sure of graduates' skills or abilities. Therefore, it is not that graduates innately lack those skill sets, but it is difficult to prove that they possess them.

We provide insights about which skills your students think they are strong in and which skills they would like to improve in order to support you in preparing your students for the working world,

Your students' top 3 strongest skills

1. Responsibility
2. Integrity
3. Team work

Your students' top 3 improvement areas

1. Time management
2. Problem-solving
3. Communication

Your students' strengths (and weaknesses)

? • Which of these skills do you consider yourself strongest in? (Please select a maximum of 3 alternatives.)

! • The graph is sorted descending by the difference between the two target groups.

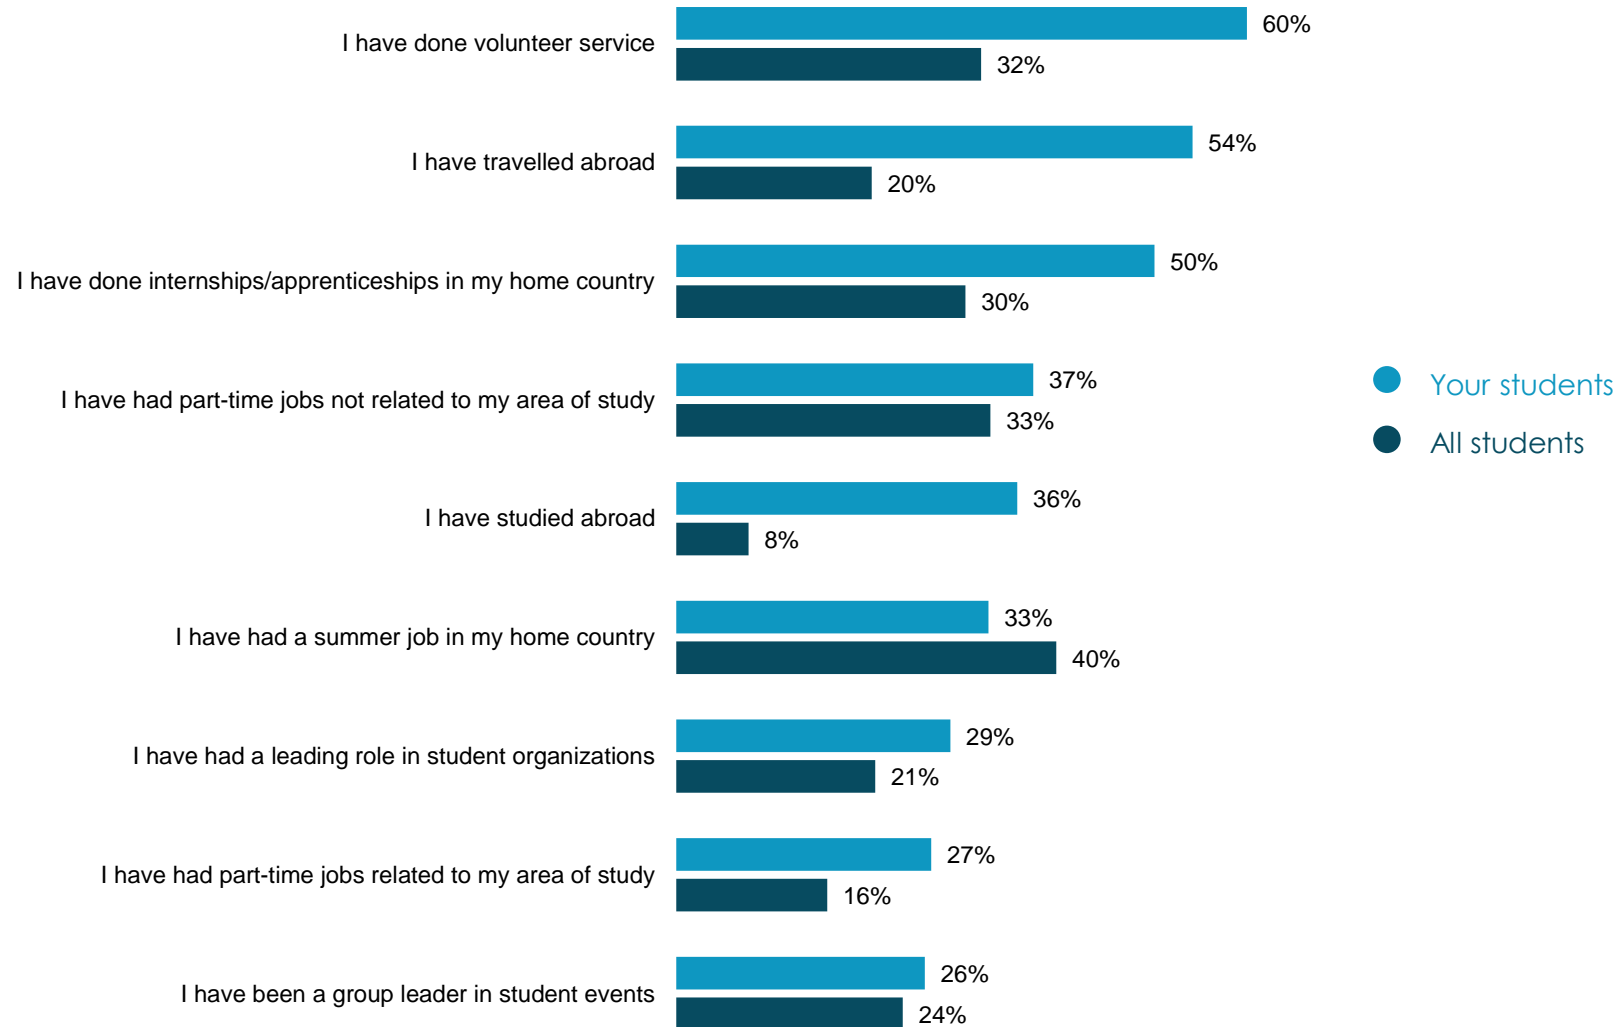

Your students' improvement areas

? • Which of these skills would you most like to improve?

! • The graph is sorted descending by the difference between the two target groups.

Practical experiences (1/2)

? • Which of the following experiences do you have? Please select as many as applicable.

Practical experiences (2/2)

? • Which of the following experiences do you have? Please select as many as applicable.

Table of contents

1 INTRODUCTION

2 TALENT PROFILE

3 UNIVERSITY BRAND PERCEPTION

This chapter **evaluates** your university brand perception with regards to four different aspects:

- Reputation & Image
- Educational Offering
- Culture & Student Life
- Employability & Future Opportunities

This chapter also offers **insights** on the preferred career/alumni services used by your talent.

What talent thinks about KIMEP University

? • What is the first word that comes to mind when you think of your college or university?

! • These are answers were provided by your talent.
 • Spelling mistakes might occur.
 • Different colors have been used for design purposes only & reflect the associations of your talent.

The Universum Drivers of University Attractiveness

University Reputation and Image

- Availability of financial aid & scholarships
- Low costs*
- High rank within its field*
- International acclaim*
- Prestige
- Recommended by friends / family
- State of the art facilities

Analytics roadmap for the future

Professionals

We recognise that there is a large demand for more information about the current workforce. This is why we have decided to expand the professional reach in the Universum Talent Survey and dig deeper into key areas including retention and mobility factors.

Soft skills

The world is moving away from primarily focusing on hard skills and increasingly focused on softer skills. Going forward there will be a greater focus on these skills to help employers make the right decisions around professional development.

Communication

'How can we successfully communicate with talent?' is one of the most asked questions by employers. That is why we will be developing the communication section to add more value to employers thinking about a communication strategy.

ACC>SS

Universum Access

We will continue to innovate on how we bring actionable insights to the forefront of your Employer Branding work. Features will be added to our online platform to increase users' ability to customize data, and facilitate rapid on-demand analysis anywhere and anytime.

INTRODUCTION

Although Idealists are focused on aligning their career with their values, their dedication has a practical side. Idealists don't spend time complaining - instead, they come up with real-world solutions to advance the greater good. Whether they work for large corporations or small, family-owned businesses, you can be sure Idealists are in the trenches, using a hands-on approach to tackle social and environmental issues. Idealists are particularly skilled with creative experimentation, which often results in innovative solutions to business problems.

Idealists choose employers who focus on corporate responsibility and community partnerships, and they carefully research company culture before accepting an offer. They want to be sure the work environment is one of collaboration, recognition and mutual respect. Idealists take business ethics seriously, and they can be relied upon to hold themselves and their employers to the highest ethical standards.

STRENGTHS & OPPORTUNITIES

Idealists bring a lot to the table when getting the job done right. Some of the strengths that stand out include:

- Idealists do the right thing - even when no one is looking.
- Idealists are leaders and motivators - they have a natural ability to motivate others to get things done.

Of course, even the best qualities can be taken to an extreme:

- Idealists take their philosophical positions and personal values seriously, which leaves little room for disagreement. This can be tough on colleagues who have an alternative perspective.
- Idealists sometimes take on more than they can handle, leaving them exhausted and overwhelmed.

SUCCESS STORIES

Idealists know that one person can change the world, and they pursue their goals driven by a passion for making a difference. These Idealists are known for the impact they have made in their fields:

Lead singer of U2, [Bono](#), has leveraged his status as household name to fight for social justice in all parts of the globe. In particular, he works to end poverty, hunger and diseases impacting impoverished communities.

Harvard Law School graduate [Aaron Bartley](#) showed the unique leadership skills of an Idealist long before he obtained his law degree. While still in school, he co-founded the Harvard Living Wage Campaign, and after graduation, he went on to co-found the highly successful People United for Sustainable Housing (PUSH).

[Muhammad Yunus](#), a Bangladeshi social entrepreneur and economist was awarded the Nobel Peace Prize in 2006 for founding Grameen Bank, which pioneered the concepts of microcredit and microfinance. His bank gave loans to entrepreneurs too poor to receive traditional bank loans, creating social mobility and development from below. He is also a co-founder of the Yunus Social Business Centres (YSBC). YSBC's vision is to encourage a new, humane capitalism through managing incubator funds for social businesses and providing advisory services to companies, governments and NGOs around the world.

CAREER PATH

Since Idealists are focused on passion projects, they often hold their first leadership roles before they enter the working world. They plan and manage fundraisers, train volunteers or participate in major projects for non-profit organizations while working in unrelated entry-level jobs. This often results in an uneven rate of career growth, because Idealists will suddenly take a giant leap forward when they find an employer that values their non-traditional leadership experience.

WORKPLACE HABITS

Idealists make it a point to do the right thing, so they can be relied upon to come in on time, complete their work and meet deadlines. Other workplace habits include:

- A balanced approach to people-focused vs. task-based activity
- A strong focus on finding solutions and taking action, rather than waiting for someone else to take charge.

INTERNATIONALIST

INTRODUCTION

New cultures and new connections are critically important to the Internationalist, who wants a career that offers the opportunity for world travel. These individuals want to explore every corner of the globe, and they are happiest in a job that keeps them moving. Boredom is the enemy for Internationalists, and they hope to one day have a chance to lead a team or influence a project that has a significant impact on the business.

These adventurers are skilled collaborators and relationship builders. They are comfortable in unfamiliar situations, and they are easily able to make connections with new colleagues and business partners. Curiosity drives Internationalists, and they rapidly absorb international customs and manners. As a result, Internationalists are an excellent choice to move the business into uncharted territory - for example, expanding into new markets or building global supply chains.

STRENGTHS & OPPORTUNITIES

Basic values drive the decision-making process for Internationalists, and they can be counted upon to do the right thing.

- Internationalists are known for their honesty and integrity, and they take ethical obligations quite seriously.
- Because Internationalists are dedicated individuals, in a pinch, they will be flexible with their time to ensure organizational needs are met.

Of course, there are some routine responsibilities in every position, and Internationalists might struggle with these.

- Internationalists are driven to seek out new experiences, and on-going completion of repetitive tasks can quickly lead to disengagement.
- While Internationalists reliably meet their deadlines, this might come at a cost to their personal life.

SUCCESS STORIES

Internationalists often spark worldwide conversation as a result of their dramatic forays into the unknown. More often than not, Internationalists are the first to visit exotic new locations, like the top of Mount Everest, and they make history for their achievements in exploration. These are just a few of the Internationalists who have made their mark.

[Cassie DePecol](#) dreamed of seeing every country in the world, and on July 24, 2015, she set out to do just that. Over the course of approximately two years, DePecol has been on a journey to increase cultural understanding as a representative of the [International Institute of Peace Through Tourism](#), combining her passion for travelling with her career. When she completed her voyage in 2017, she became the first woman to see all 196 countries.

[Harriet Chalmers Adams](#) wanted to see the world at a time when women had limited career options. She developed strong photography skills and paired them with her innate talent for story-telling, eventually taking a position as a war correspondent. This allowed Adams to indulge her passion for travel while being paid for her work.

[Carl Pei](#), an entrepreneur with an international background who took true advantage of this and co-founded the mobile phone company OnePlus. This was the first global direct-to-consumer unlocked mobile phone provider. It quickly became a popular brand worldwide. Born in China, Pei's family moved to Sweden when he was six. Pei took advantage of his international heritage early on, buying gadgets from China and using online platforms like Ebay to sell them on. He eventually used a factory in China to put his own brand to the products he sold, whilst also building the international relationships that would lead him to co-found OnePlus.

CAREER PATH

Because Internationalists are focused on the experience rather than achievement, their career paths often take many twists and turns. They tend to take jobs that offer travel opportunities, whether the position is a promotion, demotion, or lateral move. As long as the new experiences keep coming, Internationalists are content to keep the same position for a longer period of time.

WORKPLACE HABITS

Leaders enjoy having Internationalists on staff to handle any off-site work that needs doing. After all, many employees have other obligations that make business travel a real burden.

- Internationalists have strong communication and collaboration skills, easily able to make a connection with every person they meet.
- These individuals are future-oriented, always keeping an eye on how the current proposal will affect future goals.
- Big picture thinking allows Internationalists to make connections and predict the impact of business decisions long-term. This can be invaluable information for busy leaders.

HUNTER

INTRODUCTION

Always on the prowl for the next opportunity, Hunters are driven by their passion for achievement. These individuals are looking for competitive compensation and the promise of career advancement - along with the potential for high future earnings. Hunters are adaptable, quickly acclimatizing to a new company, and they are able to reinvent themselves as required to fit organizational needs.

Hunters are focused on solutions first, and their ability to innovate makes them an asset to any business. Strong skills in problem-solving make Hunters popular with clients, and sales positions are a natural fit. Because they are focused on increasing their compensation, they are especially motivated by commission-based roles.

STRENGTHS & OPPORTUNITIES

Hunters enter the organization like a storm, full of energy and ambition, bringing a host of strengths to their organizations.

- They are team-oriented and skilled at collaboration, regardless of how long they have worked with their colleagues.
- They are persuasive, able to gain consensus from individuals and groups, making it easier to move forward on internal projects, external sales, and overall continuous improvement.

Of course, that ambition comes at a price, and Hunters can take a toll on their leaders.

- Hunters don't put much stock in company loyalty, and they will often accept an offer if the grass looks greener elsewhere. Money is their primary motivator.
- Perfection is not a priority - while work will always be on-time and technically correct, Hunters aren't known for providing exceptional products when they are in a time-crunch.

SUCCESS STORIES

Hunters don't shy away from hard work, and they make sure that their efforts yield exceptional rewards. These individuals are committed to reaching the top of their fields, finding their way over and around any obstacles:

Businessman, entrepreneur, and former Presidential candidate [Ross Perot](#) is a Hunter. Though he came from humble beginnings, his drive and ambition propelled his career forward quickly. In his position as an IBM salesman, Perot distinguished himself by reaching the annual sales quota in just two weeks.

[Ross McEwan's](#) passion might be his New Zealand farm, but career-wise, he has been on the hunt for bigger and better opportunities for decades. Early on, he worked hard to establish strong foundational knowledge in banking and finance, which made him a top candidate for senior management positions in increasingly larger financial institutions. Today, McEwan leads the Royal Bank of Scotland, which has offices in the UK, Europe, Asia, and the United States.

Senator [Harry Reid](#) started his life in a ghost town. Searchlight, Nevada, had a population of just two hundred people, and his home didn't have indoor plumbing. Reid focused on his goal of gaining prestige and financial security, eventually leading the Democratic majority in the US Senate.

CAREER PATH

The Hunter is anything but methodical when it comes to career progression, and climbing the career ladder one rung at a time leads to frustration. These ambitious workers do whatever it takes to skip steps, whether that means excelling in their current jobs so they are selected for leadership positions or moving on to a new organization. Many Hunters fully expect to find themselves in the C-suite midway through their careers. Fortunately, their solid skills, innovation, and strong work ethic make this goal achievable.

WORKPLACE HABITS

Overall, leaders are generally thrilled to have a Hunter on their team, because their work ethic and drive is unmatched.

- These individuals will always put deadlines and client needs ahead of their own personal lives, making them easy to manage.
- Leaders can expect work to be on-time, though it is possible that Hunters will cut corners here and there as necessary to meet deadlines.
- Hunters are problem-solvers by nature, and they offer creative solutions to complex issues.
- Financial recognition is a simple and effective method of keeping Hunters engaged.

CAREERIST

INTRODUCTION

The ambitious Careerist is nothing if not practical. Careerists don't expect promotions to magically appear. Instead, these hard workers roll up their sleeves and give every position their best, adding value that leads to future career opportunities.

Careerists move through their career progression step by step, making the most of each chance to learn new skills. They always have their eyes on their ultimate goal: reaching the very top. Popular career paths for the Careerist include management tracks in large organizations and careers that have clearly defined paths from entry-level to leadership.

The challenges they may face on this upward path only spur them ever onward. With the knowledge gained at each step adding to their growing arsenal of skills, careerists find themselves well-equipped to steadily overcome obstacles and move forward.

STRENGTHS & OPPORTUNITIES

Careerists possess great strengths:

- They have a remarkable ability to collaborate and adapt, no matter what their job title is.
- These individuals work well in teams, offering support and career development to others who wish to learn.

These strengths eventually turn into leadership positions, as Careerists earn the respect of their leaders, peers and subordinates.

However, the drive to achieve can take a dark turn if Careerists find themselves with a toxic manager.

- Lack of recognition for their hard work can take a toll on engagement and productivity.
- Careerists don't let criticism roll off their backs, and they are harder on themselves than anyone else.
- When in positions where they feel unsuccessful, Careerists can lose their confidence, leading to long periods on the same rung of the ladder.

SUCCESS STORIES

Careerists often work their way up from the ground floor, running companies where they were once entry-level workers.

In 1971, [Jim Skinner](#) took a job as a McDonald's restaurant manager trainee. He mastered a series of progressively more responsible positions, until he was ultimately named vice chairman and CEO in November 2004.

[Ursula Burns](#) knew hard work would take her far, but when she started as an intern at Xerox, she had no idea where she would end up. She moved into an executive assistant role, where she learned the skills needed to successfully run a business. After a long series of career steps, Burns was named chairman and CEO of Xerox in 2009, making her the first African-American woman to lead a Fortune 500 company.

Though stories of mailroom clerks working their way up to executive positions seems like a fairy tale, [Dick Grasso](#) lived this amazing journey. He started off in the mailroom of the New York Stock Exchange in 1968 and proved his ability to lead over and over again. He climbed the career ladder rung by rung, and he was named chairman and chief executive in 1995.

CAREER PATH

A Careerist's career path often follows a very straightforward route. With an affinity for organization and structure, the Careerist will seek the path that offers the perfect combination of stability and upward progression. This often means that Careerists seek to remain with an employer for the long haul, rather than jumping from ship to ship.

This loyalty and dependability is often enough to earn them the respect of their employers, which further helps propel them along their path. Such organizations where these traits will serve a careerist well include careers in the military, law enforcement, the financial sector, law or various medical professions.

Along their path, Careerists always seek to maintain a strong image of professionalism, while also acting according to their strong values and principles. To that end, they often quickly rise to a managerial position, as they typically exhibit many leadership traits.

WORKPLACE HABITS

Careerists are often easy to recognize due to their definitive workplace habits:

- Careerists work hard to ensure that their work always exhibits the highest standards of quality—they will never seek to cut corners.
- Always striving to follow the rules, these by-the-book workers know their responsibilities and work dutifully to complete them each day.
- Careerists are also loyal, and should one earn their respect, they will remain steadfast in their resolve to help that person achieve greatness as well.
- Careerists can often be stubborn—a careerist that operates too by-the-book can be limited in flexibility when working with other personality types.
- A careerist is not afraid to voice his or her opinion—however, some opinions aren't always warranted or helpful.
- Those who don't work as enthusiastically as careerists do can lose a careerist's respect, making it hard for them to work together.

HARMONIZER

INTRODUCTION

Job-hopping is fashionable in today's ever-changing business environment, but that is one trend that the Harmonizer career type won't follow. These loyal employees treat their coworkers like family, and they are always ready to take on additional responsibilities for the good of the team. Because they are focused on building strong relationships, they are excellent additions to collaborative team environments. Harmonizers are happiest when their colleagues are content, and they have a talent for finding win-win solutions to interpersonal problems.

STRENGTHS & OPPORTUNITIES

Because Harmonizers are so positive, they bring a wide variety of strengths to their work. Examples include:

- Harmonizers are frequently recognized for influencing and leading coworkers through organizational changes.
- Managers often rely on Harmonizers to get the job done, because they are dedicated to putting in extra effort when required for the good of the team.

Harmonizers do have opportunities for growth, and many set goals to overcome these issues:

- Spending too much time focused on interpersonal relationships at work to the exclusion of completing work responsibilities.
- Creating a balance between work and family -- Harmonizers have a hard time saying no, which leads to time conflicts.

SUCCESS STORIES

Some of the most successful individuals in the business world capitalized on their interpersonal skills to boost their career development. These Harmonizers can be found in a wide variety of top employers across industries. Examples include:

Former Evernote CEO [Phil Libin](#) thought that the only way to be happy at work was to stick with companies that have no more than 50 employees. However, as a Harmonizer, he was able to transform the work environment of a mammoth technology company into a culture of relationships and cross-team collaboration usually only seen in tiny startups.

[Tony Hsieh](#), CEO of Zappos, has created an extraordinary career from finding and sharing happiness. After selling his startup at the age of 24 because he wasn't enjoying his job anymore, he wrote the bestselling book "Delivering Happiness" and launched his own coaching company. As leader of Zappos, he has created a work environment that is considered the gold standard in employee engagement.

[Eleanor Roosevelt](#), was not only the First Lady of the US but also played a key harmonizing role during her distinguished career as a diplomat. She was instrumental in the founding of the United Nations and the US joining the organization. She subsequently became the first delegate from the US to the UN. Whilst serving as the first chair of the UN Commission on Human Rights, she oversaw the drafting of the Universal Declaration of Human Rights and constantly worked to gain closer cooperation between countries on issues of Human Rights.

CAREER PATH

Loyalty to their managers, coworkers and company keeps Harmonizers from job-hopping, which means they usually enjoy a straightforward career trajectory. Through hard work and a reputation for communication and collaboration, they are regularly promoted to positions that are increasingly more responsible. However, Harmonizers won't stay in a job that threatens their happiness and well-being for very long. When the environment is dysfunctional or toxic, Harmonizers move on, and their long list of accomplishments makes them attractive candidates for future career advancements in alternative organizations.

WORKPLACE HABITS

It is easy to spot Harmonizers in the workplace -- they are the first to greet you and make introductions when you walk into a room. Other workplace habits include:

- A focus on actionable solutions -- count on Harmonizers to find creative ways to overcome obstacles.
- Strong communication skills -- when there is a lot of disagreement in how to move forward, Harmonizers can always find common ground.

LEADER

INTRODUCTION

While leaders might know business processes inside and out, their true strength is seeing the big picture. These take-charge individuals can relate individual tasks and assignments to larger organizational goals, and they have a gift for communicating their vision in a way that inspires their teams - and themselves - to push forward through tough times to achieve exceptional results.

STRENGTHS & OPPORTUNITIES

Leaders typically possess the following strengths:

- Leaders understand the value of teamwork, and they are skilled at creating cohesive groups to get the job done.
- Leaders don't fear responsibility - they thrive on it. You can count on leaders to accept accountability for end results.
- Leaders are introspective and quick to identify their own opportunities for growth. By the time you give them feedback, they are typically already aware of and working on the issue.

Of course, no one is perfect, and even leaders have challenges to overcome.

- A strong desire to be the master of their own fates makes it hard for leaders to accept authority. Since everyone answers to someone - even if it is an entrepreneur answering to investors and clients - leaders can struggle when they need to give up some control.
- Leaders are their own harshest critics. Sometimes, they hold team members to the same unreasonably high standards that they hold themselves to. This can damage relationships with those they are leading.

SUCCESS STORIES

The world is full of successful leaders who have transformed the world we live in. Some of today's biggest influencers include these remarkable examples:

[Indra Nooyi](#), coming from humble beginnings, she gained admission to Yale School of Management and worked night shifts so she could pay for her college tuition. After working in various organizations such as Boston Consulting Group and Motorola she was appointed CEO of PepsiCo, making her the leader of the second largest food and beverage company in the world.

[Bill Gates](#), co-founder of Microsoft Corporation, has led the brand to become one of the most recognized in the computer industry. He has always looked forward, leading the pursuit to constantly diversify Microsoft products and has ingrained this into the organizational culture. He is also recognized for helping others by giving back through The Bill and Melinda Gates Foundation, providing the funding for necessary resources to people all over the world to improve both their lives and their career opportunities.

[Salil Shetty](#), as Secretary General of Amnesty International since 2010, he has lead the organization's movement to end human rights violations worldwide. He has held leadership positions in several humanitarian organizations including the United Nations Millennium Campaign and ActionAid. During his time at ActionAid he is credited with transforming the charity into one of the world's leading international development NGOs.

CAREER PATH

Most leaders know where their passion lies early in their careers, and they get themselves on the path to management as early as possible. From Student Council positions in high school to leading projects and student organizations in college, these individuals have been developing leadership skills their entire lives. They make it a point to excel in entry-level jobs, ensuring they will be selected for increasingly responsible supervisory positions. They often volunteer for stretch assignments, creating a solid reputation that sets them apart from their peers.

WORKPLACE HABITS

Leaders feel most alive in collaborative environments, when they challenge themselves, when their team wins and when they have learned something new. Other workplace habits include:

- A preference for making decisions using a flexible work style that goes with the flow, getting the best from every team member.
- An energetic workstyle, expecting a lot from themselves and others.
- A tendency to sacrifice personal time when working on exciting or important projects. This can be damaging to personal relationships in the long term.

ENTREPRENEUR

INTRODUCTION

Entrepreneurs are the type of individuals that create their own companies from the ground up. They can be found in organizations of all sizes, offering innovation and creativity to grow and expand the business. They thrive in an environment where they have some flexibility to pursue passion projects. As employees, entrepreneurs are fast learners, and they require ample development opportunities to stay engaged.

STRENGTHS & OPPORTUNITIES

Growing businesses often owe their success to the Entrepreneurs on staff, as these are the employees that find methods of differentiating the organization from competitors.

- Entrepreneurs have a strong work ethic, and they can always be counted on to go above and beyond when needed.
- These employees strive for perfection, and they place more weight on the quality of their product than meeting deadlines.

Managing Entrepreneurs can be tricky, and leaders need to understand when to be firm and when to allow flexibility.

- It can be difficult to persuade Entrepreneurs to attend to their day-to-day responsibilities when they are inspired by a new idea.
- Entrepreneurs tend to take on more than they can reasonably handle when new projects and development opportunities present themselves.

SUCCESS STORIES

The biggest advances in culture and technology don't generally come from the corporate world. Instead, they come from visionaries who take major risks by striking out on their own in pursuit of new ideas. These remarkable individuals are entrepreneurs - innovative thinkers who wouldn't settle for the status quo:

Entrepreneur [J.K. Rowling](#) didn't just change the world -- she created an entirely new one in her wildly popular Harry Potter series. Rowling built an empire based on a few sentences she scribbled on a coffee shop napkin.

[Steve Jobs](#) knew that computers could change the world -- but only if they were accessible and intuitive to everyday users. His creation of Apple computers has driven technological innovation, bringing the power of computers and later, mobile technology, to average homes around the globe.

[Harold Schultz](#) left Starbucks in 1985 due to his frustration at the owners not accepting his ideas. He managed to raise \$400,000 funding from various sources, including a doctor who was impressed with his willingness to take a 'gamble'. Schultz opened his own coffee store, reflecting his idea of what a coffee store should be. Two years after opening, the owners of Starbucks turned their attention to other ventures and Schultz bought Starbucks for \$3.8 million. Today Starbucks revenue totals \$21.67 billion and the chain can be found worldwide.

CAREER PATH

The career path of an Entrepreneur is a winding road, marked by soaring highs and crushing lows. Entrepreneurs take risks, building new businesses or creating innovative products within a larger organization. While they are natural leaders, Entrepreneurs aren't looking for power and prestige. As they grow and develop their skills, they encourage others to join their journey to challenge the status quo, finding bigger, better ways to get the job done.

WORKPLACE HABITS

It is easy to spot Entrepreneurs in crowd. They are the ones asking, "What if we do it another way?"

- Entrepreneurs are solution-focused, and they can be counted on to overcome obstacles that others can't quite manage.
- As employees, Entrepreneurs are ready to take on a challenge, and they make excellent additions to project teams.
- While Entrepreneurs expect fair compensation that permits them to live comfortably, their priority is developing their skills. Recognition in the form of interesting new assignments keeps these employees engaged.

universum

Thank you!
